Who we would like to work with

- All together, all the time
- A mixture of all together, and working with your own LA
- Just with your LA all the time

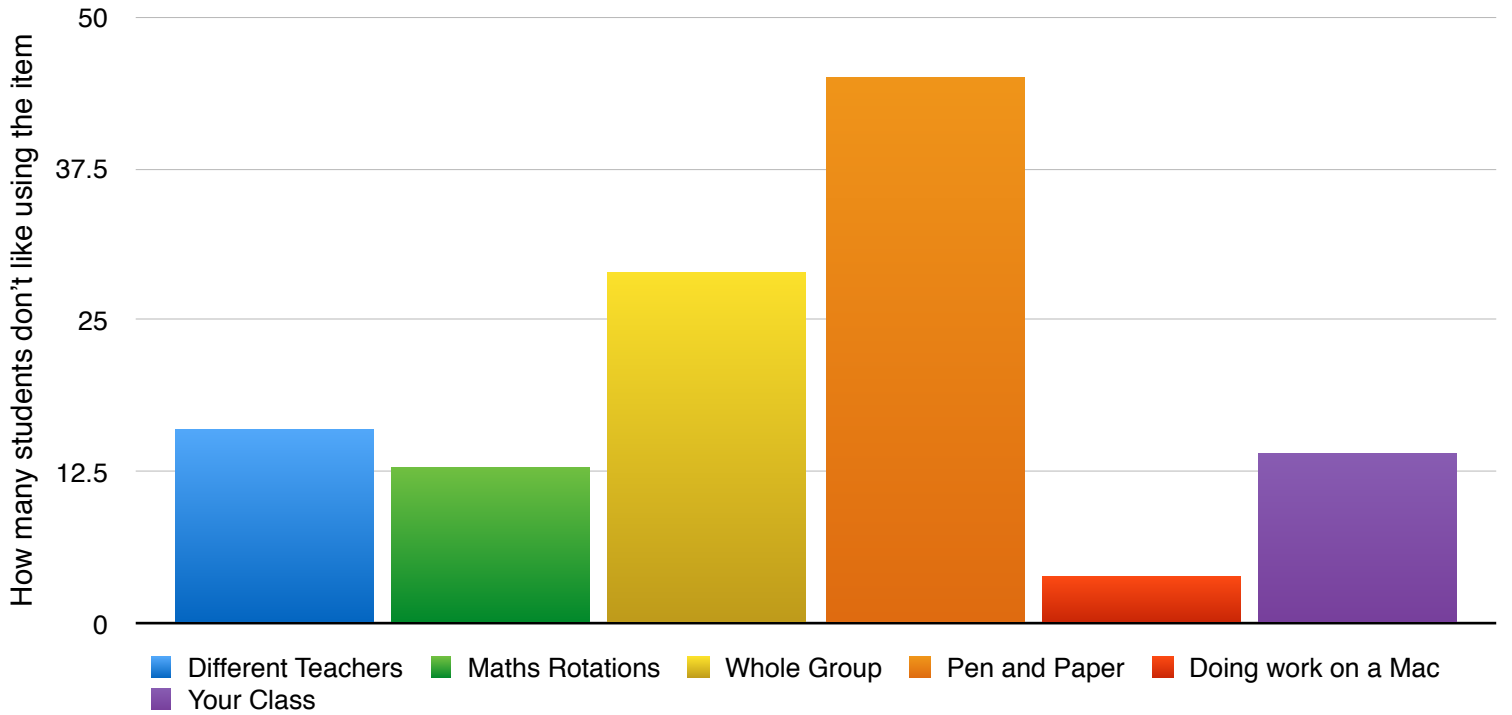

Student satisfaction of moving between classrooms

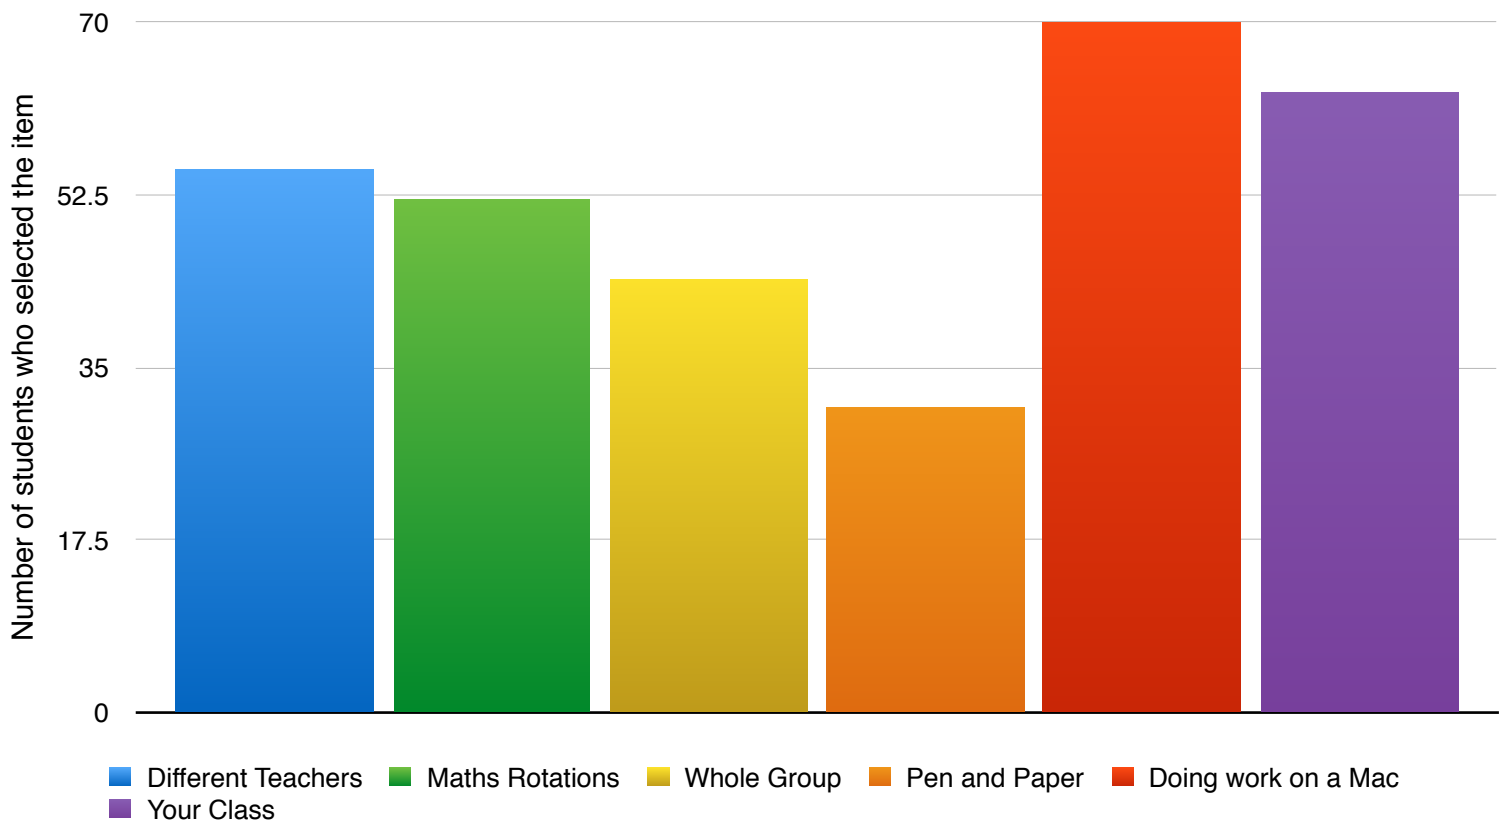

- Yes
- No
- Sometimes

How we would like to spend 8:30am - 9:00am

How do we learn best?

Year Six / Seven - LA13 / LA14 / LA15
Learning Spaces Survey
Term One - Week Ten 2014

If you could arrange the three classrooms anyway you wanted, how would you do it?

- more posters
- Put the three classes in the double room
- I wouldn't know because I don't mind what it's like
- Leave it the same but not go into the other classrooms expect the classrooms with Mrs Russell, Mr Hayward and Miss Harris
- I would move the couches and bean bags to the side of the room. I would put the big trays at the very back to avoid large clumps crowding in that area. I would rearrange the desks in cool patterns and I would make large groups so people can interact with lot of people
- 2 desks and 6 pink chairs for punishment. 4 couches around the room, and 3 bean bags with white desk in the front
- I would like to have big groups and small groups of tables, the couches in one spot and the bean bags in another spot
- I like how the three classrooms are set up and whats in it
- If we could I would maybe have another couch and have them facing opposite each other with the white small tables. I would then have 2 beanbags and have white table in the middle. Maybe we could order more swivel chairs so everyone has the opportunity to sit on it because if you think about it there are six classes sharing the furniture
- I would make LA15 the beanbag and couch room and the other classes are normal chairs, swirly chairs, moon tables ext...
- One big super class with more beanbags and couches
- Couches in front of the white boards and every thing around it
- I would put all of the cool stuff in one classroom and you can choose which class room you go into for the day. Then you can still see your friends and hang out with your friends one day, and not the next because you might not choose the same class room
- Well I would get more blue and green tables and more swivel chairs. Mini trampolines. Break the wall down.
- I wouldn't change a thing, I think the way the three classrooms are, are good already
- The best way to do is, put the teachers desks in the middle and have all the couches together and have the desks spread between two rooms
- To have one really long lounge you all sit on that, but with a bigger desk
- I would leave it the same because it is the best place to learn
- I would move the couches so that when you are watching something in Ms McClearlys room you can see. I would also move the white tables somewhere else so that when we use the couch and bean bag we don't have to bend down. I would also move the small swivel chairs because half way through the day my knees and back hurt.
- I would knock down the wall. Set up the tables in big or small groups. Put more colours on the walls, like painting the walls or more posters
- I would like the classroom set up with the couch faced against the wall, then have the book shelf next to the couch then have all the moon desks in one line, then have all the white desks all in one big circle facing the TV
- I would make less things inside and more things outside so there was an even amount of things in each learning are but still space for us to move
- I would keep them the same
- Half separate desks, half double desks. The couch is placed at the back with a normal table in front (with a seating time table). We take down the SmartBoard. Take down the pinup boards at the back of the room and put whiteboards there.
- I would put the couches and beanbags in a little corner. All the desks would be separated into late groups but arranged in different ways. Would like lots of bright posters
- I know we don't have these items, but I would like slightly large whiteboards where we can do large brainstorm for things

Year Six / Seven - LA13 / LA14 / LA15
Learning Spaces Survey
Term One - Week Ten 2014

- One big classroom
- I would keep them the same but I would like our class to be the fun class and not thane any boring stuff in it the the old tables and chairs
- If i could arrange the three classroom how ever I wanted i would keep them the same, only maybe add some curtains so then when we are watching presentations it would be easier to see
- All couches and pillows, no desks
- Have couches and bean bags in corners and desks in the middle, all in groups
- Well...I am actually fine with the way it is

Tell us anything else that we can do ti help you be the best student you can be:

- Hands on fun
- Not go to the other class, but go work with the triple class
- To help me be the best student I could be can we work in groups more often with people we get along with. Maybe not use the computers too much because it makes my head hurt and makes my vision blurry
- Explaining things the first time and the second time, explain the main parts
- Sometimes I find it good to work with other students but i like to work in pairs, not groups because I find it easier to share ideas and work together
- I like it when we have different teachers for different subjects and just our LA teacher for other subjects. I like that we have different websites to do our homework and school stuff
- More hands on stuff
- Nothing much, I like most of how we learn right now, except I don't like moving into different classrooms
- A chance to work with the differs groups of year sevens
- I'd like trouble makers to stop distractions and attention seeking. Teachers should be more aware of any trouble that is going on without them knowing. Bullying must go down in some classes for example: teasing about what clothes they wear, Minecraft games stye play. Even though we may stop that ourselves, bigger trouble means bigger punishments
- Let us just work with LA13 but LA15 only sometimes because then I'm not wasting my learning time waiting for them to find a spot and sit down
- Help me learn English
- There is nothing much more
- Well I would like to do more projects like on iMovie and you can show the class what you have done
- I think I am the best student I can be
- I would want to do more hands on things when I sit in one place for a long time I get fidgety and I don't stay on task. Let me play music
- I think it is good the way it is
- Explain less and let us get right into the work and if we have trouble maybe come and see you at your desk. Because sometimes teachers go on and on and don't stop talking then we have a lot less time to do our work and usually have it for homework. More interesting homework rather than doing the same stuff every week, but I do like using Spelling City and Khan Academy
- I would like to be more challenged in my learning, by that I mean for me to have more extension work that pushes me to my expectations. I would also like to be pushed in my spelling and not have words that I had spelt in Year One because those are really easy, by that I mean to be put in the highest spelling group
- Sometimes you could help me by explaining things in more ways than one because sometimes things don't always make sense the first time you explain them
- Do more Math
- Have a silent room, and a room for discussing and collaborating
- I am actually fine :)
- Add more bean bags and couches
- To allow me to listen to music and let me move around once in a while because I get too restless and fidgety

Year Six / Seven - LA13 / LA14 / LA15

Learning Spaces Survey Term One - Week Ten 2014

- I think we should get rid of the MacBooks and replace them with iPads because if you break them it costs more money. I want to wrk with the people in LA10/11/12 because all of my friends are in there and it would be more fun
- I would like more harder words being around the classroom so when I am writing I can use those words
- To work with all year levels
- I can't work very well in silence, I'm better working with noise
- Cater to the Year 7's needs. Honestly I don't like there being Year 6's because the teachers need to cater to Year 7's only. I mean having the Year 6's is cool, but all Year 7;s are ideal. It won't happen, but thats my opinion. I don't like to be around rude, obnoxious and stupid boys because it distracts my learning, and they do not respect me and I won't tolerate it. Cater to each persons needs please and try and take some consideration that people are sensitive so yo have to talk to different people in a different way
- Not putting all the work up on websites because sometimes people have a problem with the computers so they really can't do it on their own. It gets really stressful, but I like it most of the time. I would also like if the Year 6's could do their won thing sometimes
- Doing things hands on and having fun
- I don't think you have the change anything
- Give us just a little bit of homework, not too much please :)
- Make you don't have to do homework
- Nothing much else can be done because I have been having an awesome time with things the way it is
- Having extra help
- Having worlds around the room so we can write and not use the same words
- You can give us more time to finish our work and for projects and let us do more fitness and do graffiti art and use the laptops more
- I would like to have fitness at least 2 times a week
- Having extra help
- Learning more about time, and maths, and history. Having Mrs. Mlilton help me
- Everything that I believe that can make me a better student I have already covered, like, having constantly misbehaving students dealt with more harshly and letting me learn a bit better.
- In my own opinion I think every teacher has made me CLICK! In every subject possible they have really helped me along the way even when I am totally fed up with the subject
- Say everything you have to say at the start of each lessons and then let us get on with work, after we've finished we pass it to you and DONE. Please do not give us homework because when I am at home I am more interested in dealing and having fun.
- Getting different teachers to do different subjects
- To have less projects a term
- Hands on work
- At least two projects a term
- To tell us when we are being silly because next year they will be really tough so prepare us for it
- To give us a little bit more info about what to do with a certain tasks
- All the naughty kids go in a corner
- Having less distractions in the class such as students that never be quiet and don't stop moving around the class

My ideal learning environment would be:

- I like working with other classes
- Working with all three classes
- Not crowded but with people from all classes
- Just learning with my class or the other three classes we never go to
- My ideal learning environment would be just working in my LA with more couches, bean bags and pillows
- All three classes mixed together with three teachers and 90 kids

Year Six / Seven - LA13 / LA14 / LA15

Learning Spaces Survey Term One - Week Ten 2014

- I like to work and collaborate with other students and spread out onto the grass, the wet area and other classes.
- A quiet room with punishments for who ever is annoying others
- Moving around helps me work more because the atmosphere feels refreshing and I can sit in a table of chair that is comfortable and it makes me less nervous
- Rotate through being in a quiet room and a talkative room with a comfortable space and not squeezing space and working in all the classrooms
- I would like to come in, sit down, do my classes. I like using my MacBooks, but I also like suing pen and paper. I don't like it when we are given a random topic and we have to write what we know without researching about it
- My ideal working environment would be just working in your own LA and having just a small group people from the other classes
- My ideal wring environment in laying on beanbags with the fans and aircon on, no noise, just laying down
- Working with the other classes, and comfortable chairs. Making one big class from all three classes, knowing down the wall separating LA14 and LA15
- My ideal learning environment would be comfy swivel chairs, working outside
- Everyone working well together and having a lot of cool stuff that we learn on or with
- That we get to use different furniture and the colourful things. The plants to make the room feel natural
- Usually quiet when working independently, but when communicating it's ok as long as it's not too loud and off subject. Other than that i think our normal learning environment are awesome
- Just LA13 and LA14, the reason I don't like having LA15 in the same room in because it takes so long for everyone to get ready and it's squishy. LA15 takes all the furniture in the morning.
- So I can catch up with my friends in other classes
- I would like for all three classrooms to be connected and a comfy carpet wall so we can lean on it. Also I would like the carpet floor thingies that Miss Screaigh has in her classroom
- My ideal learning environment is what is set up in our classes
- I like my environment now, but maybe take away the white tables
- I like learning with the other LA's sometimes. I also like having to work with other people from the other classrooms
- I would like to have more colours in the classroom because they seem kind of dull
- I like how we use the BIG TV when we need to follow instructions. I like how in LA15 we have the class bingo
- My ideal learning environment in a small painted black board on each desk and the wall knocked down, with coloured concertina doors, coloured wall and things like tree desks and couches outside
- Having LA15 as a quiet room and being outside sometimes
- Not working with all three class all the time
- No double desk because you usually get distracted a lot and it take away from your learning time. A couch with a timetable, more beanbags, more fluffy mats (that Miss Screaigh has). Pillow because it become uncomfortable just sitting on a plain plastic chair. Painted walls with a lot more colours around the room rather than just work. An idea chart somewhere on the wall
- My ideal learning environment would be lots of bright colourful posters all the furniture that we have at the moment. Also a bit of noise allowed but not a lot of it
- Lots more moon tables
- My ideal learning environment is like how the other side is set up, but just a mini version in LA15, and not LA13 and LA14. I also would just like to work with just the Year 7's and not the Year 6's, but sometimes I would also like to work with the Year 6's
- My ideal learning environment would be working with all three classes sometimes, and then being with the students in Mrs Bin Salleh's class for the rest of the time. le would also be more ideal to work more with just my class
- Play music while working
- Teacher gives us a task we work either with MacBooks or paper, and we can work in just our class or with the other LA's

Year Six / Seven - LA13 / LA14 / LA15

Learning Spaces Survey Term One - Week Ten 2014

- Most of the time i like learning alone or when it is really quiet. I also like learning in nature. I would also like us to not have a wall so we can work with LA15 too.
- Having to work with your friends and work in the wet area or outside once in a while. Plus listening to music
- My ideal learning environment should be when you arrive at school you start with your home LA teacher, and when we need to do stations, big activities we go in with the other classes. We should use less paper and more computers because you can do so much more than on paper.
- We should plan our classrooms like LA10/11/12 because they call themselves Area 51 and I think it is really cool and us three classes should do this where our teachers desks are in the middle of LA13/14 and we just walk around to LA15
- I like when we move around for maths, though i dislike going to LA13/14 in the morning
- I like learning with more different furniture, because it's all the same. I like working with my homeroom teacher, because if we work with all the different teachers it's too confusing and you have to remember that and this and sometimes you have to ask the teacher
- It would be better if sometimes if the students are good we could play music (this generation)
- More colour in the class
- Some more pillows to put on the couches
- Get rid of the wall and have one huge classroom, and you could put poles in the middle so that it's stable
- My ideal learning environment would be comfortable. I would like to have lots of furniture other than the normal chairs. I do like posters up. I like having the shelves with books and lies on them as they keep things organised. I thnk that when I like my learning environment it would be easier to learn
- My ideal learning environment is where everything is quiet, beanbags, couches and where we can listen to music whilst doing work.
- My ideal learning environment would be getting to mix with Miss Screaigh's class at least once a day. I'd also like having some bigger desks because all of my friends sit at the one table, and if your late you either sit on the other side of the classroom or squab in at the end of the desk. This might sound weird but I like it when sometimes the teacher chooses where you sit, but not all the time
- My ideal learning environment would be comfortable things like cushions and I like working outside and small groups.
- My ideal learning environment is getting ready for High School, so we move to different class rooms and the teachers stay. Comfortable learning areas with comfortable chairs
- I lkie to move around because it is getting us ready for High School
- I like the way we do things in class and sometimes outside
- When we work mostly with our LA and then go into the double classroom to do History and Science
- Work on the walls and hanging up, more normal and moon tables
- My ideal learning environment would be having different types of desks and chairs
- I like how in the morning LA15 come in and get settles
- Working mostly in your home LA but also goto the other classrooms 3/4 times a month.
- Working in groups and being able to work in areas that we would like to such as, wet area and outside
- I like to work on a Mac and pen and paper
- In different classes than normal with comfortable furniture and moving around every day for different subjects
- I like the learning environment
- I like being in my own LA class
- My ideal learning environment I would take away the couch and put more swivel chairs and more plants. More moon table and no little tables. I like the big TV and have more sports equipment
- More awesome furniture
- I like working when we are in partner and working in different space like the wet area, outside and in different classes
- I like the learning environment
- I like the way it is

Year Six / Seven - LA13 / LA14 / LA15

Learning Spaces Survey Term One - Week Ten 2014

- I like our learning environment because we have couches, different chairs ect. It makes me feel more comfortable when I am learning and make me feel more at home. I don not like how we have to move into other classrooms just to do our spelling, then ten minutes later we have to move to our own class. It would be better if we could stay in our own classroom to start the morning off, and then if we all have something to talk about we can move into the double. i also do not like how other people get the beanbags and everyone else is left to sit on the floor
- Being with the other classes more (LA13/14)
- Misbehaving students have a bit more harsher punishment so the classes don't get disturbed, having amid of all three teachers, but sometimes with your own teacher
- I like how in the morning we get all three classes in here
- I don't like how we have big posters in the middle hanging off the fishing lines
- Quiet class, teachers select our groups of partners for us and more plants
- All three classes joined up. All working together, hardly any normal tables. Desks we can draw on to do working out. Different coloured wall. Teachers cupboards in the wet area. Teachers desks in the middle
- My ideal environment is having more couches and swivel chairs
- Bigger room
- Spread out, couches outside, tables wrapped around trees. Massive pillow beanbag, maybe something done on the canteen wall
- To get rid of the big trays, take our bags inside the classroom. Get rid of the small projector, get rid of the small, unstable tables
- I want to have my last year of primary school in my own room
- I like sitting on the bean bags
- I would like sensible kids around me when I'm learning as it can be highly annoying getting distracted
